

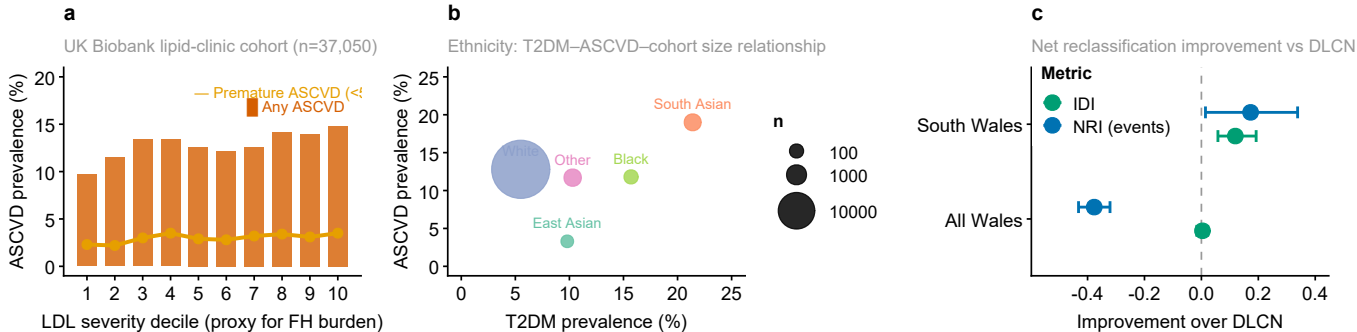

Figure 4 | Clinical outcomes and reclassification.

a, Any ASCVD (bars) and premature ASCVD (<55 years, line) by LDL severity decile in the UK Biobank lipid-clinic cohort.

b, Ethnicity plotted by T2DM and ASCVD prevalence; South Asian patients show highest T2DM (21.4%) and ASCVD (19.0%) rates.

c, NRI for events and IDI of TUDOR vs DLCN. South Wales NRI_events=+0.173 (95% CI 0.014–0.338; p=0.033).

ASCVD, atherosclerotic cardiovascular disease; NRI, net reclassification improvement; IDI, integrated discrimination improvement.
